

Grinding · Deburring · Polishing Stationary Suction systems

Applications

Dust extraction for belt grinders

Special advantages :

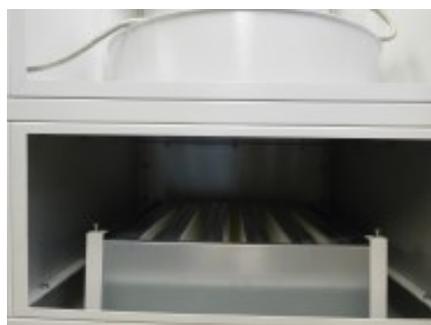

- Custom-built extraction solution for nearly every type of dust
- High filter surface & high effectiveness
- Large selection of filter material depending on the dusts to be filtered
- Extraction of steel, stainless steel and aluminium dusts
- Absolute final filter for stainless steel dust Extraction capacity of 2.000 - 10.000 cbm/h
- Automatic switch-off in case of emergency stop

Cartridge filter with
compressed air
pulse cleaning

Pressure relief plate

Absolut fine filter
Filter class
H 12, H 13, H 14

Pulse cleaning control

Control box for machine coupling

Pressure relief flap of the extraction for aluminium dust

Internal spark baffle
